Traffic Advisory

US 36 Express Lanes Project construction activities begin with barrier installation this weekend

DENVER — The Colorado Department of Transportation (CDOT) will begin construction activities on the US 36 Express Lanes Project on Sunday, July 22. The first activity will be the installation of barrier on westbound US 36, which will require a right lane closure starting on Sunday and continue nightly from 8 p.m. to 5:30 a.m. through Thursday, Aug. 9. This work will kick off the construction to begin temporary paving. The temporary paving will allow the traffic shift to take place for the fall work of 2012. The closure will start one mile east of Sheridan Boulevard and end one mile past Church Ranch Boulevard. Flaggers and signage will be in place to help motorists navigate the lane closures.

This is the first construction activity for the \$312 million multi-modal project that will build an express lane in each direction on US 36 from Federal Boulevard to 88th Street in Louisville/Superior. The lanes will accommodate High Occupancy Vehicles (HOV), Bus Rapid Transit and tolled Single Occupancy Vehicles. In addition, the project will replace several bridges, build a commuter bikeway, add Bus Rapid Transit improvements, and install Intelligent Transportation Systems (ITS) for tolling, transit, and traveler information, and incident management.

The Ames Granite Joint Venture team is the design-build contractor for the project, which is scheduled to open to the public in January 2015.

For more information about the project, go to www.us36expresslanes.com. To receive free email updates during the project, click on the cell phone icon in the upper right corner. You can then subscribe to a variety of lists including “US 36 Express Lanes Project.”
